

Joe and Inigo For Green Officers

About Us:

We're Joe (he/him) and Inigo (he/him), both second year Lawyers and committed environmentalists. We hope to further an environmentally conscious community here at Downing through education on and interaction with environmental issues.

Our Approach:

Environmental policies should not be considered in isolation. They are intrinsically linked to our social, political, and economic welfare. Only a holistic approach to environmentalism within Downing will succeed in fostering sustainability and community.

Proposals:

Education:

Structural environmental change requires mass action and education. If elected, we will:

- Host screenings of **documentaries** and **films** relevant to key environmental issues.
- Utilise the '@downingjcrgreen' **Instagram** account to circulate college-specific information and relevant environmental articles and news.

Welfare:

Our relationship to nature is crucial to our wellbeing and sense of identity. Thus, we propose to:

- Organise opportunities for students to re-connect with nature, alongside our **welfare officers**.
- Provide greater information regarding use of the **student garden**.

Broader Issues:

- Work with the JCR and College to ensure that **tree-felling** proposals are performed in a manner consistent with the interests of the student body, and the sustainability of College. Felling is not inherently wrong, however communication with the student body is essential.
- Work alongside the **CUSU Green Campaign** and other social justice campaigns to publicise initiatives and encourage participation.
- Explore rewilding and no-mow zones within College.
- Engage with wider environmental campaigns, such as the **Pesticide Free Campaign**.
